JOURNAL OF
Advanced Transportation

VOLUME CONTENTS 2012

Volume 46 Number 1 **January 2012**

Research Articles

Operational impacts of incident quick clearance legislation: a simulation analysis
R. Fries, C. Hamlin, M. Chowdhury, Y. Ma and K. Ozbay 1

Intelligent transportation systems: an impact analysis for Michigan
U. Farooq, M. A. Siddiqui, L. Gao and J. L. Hardy 12

Understanding members' carsharing (activity) persistency by using econometric model
C. Morency, K. M. N. Habib, V. Grasset and M. T. Islam 26

Maneuvers of motorcycles in queues at signalized intersections
C. C. Minh, K. Sano and S. Matsumoto 39

Effectiveness of red light cameras on the right-angle crash involvement of motorcycles
H. C. Chin and M. M. Haque 54

Bayesian predictive travel time methodology for advanced traveller information system
A. M. Khan 67

A computational model for the probit-based dynamic stochastic user optimal traffic assignment problem
Q. Meng and H. L. Khoo 80

Volume 46 Number 2 **April 2012**

Research Articles

Simulation of an intermodal container center served by air, rail, and truck
G. A. Harris, B. J. Schroer, M. Anderson and D. P. F. Moeller 95

On seat capacity in traffic assignment to a transit network
F. Leurent 112

Development of an integrated system based vehicle tracking algorithm with shadow removal and occlusion handling methods
J. Oh, J. Min and B. Heo 139

Disaggregate safety evaluation for signalized intersections and evaluation tool
Y.-J. Kweon 151

An intersection turning movement estimation procedure based on path flow estimator
A. Chen, P. Chootinan, S. Ryu, M. Lee and W. Recker 161

Analogy of fixed route shared taxi (taxi khattee) and bus services under various demand density and economical conditions
A. Gholami and A. S. Mohaymany 177

Special Issue: Recent Advances and Practices in Dynamic Traffic Assignment

Guest Editors: Takamasa Iryo and Sho-ichiro Nakayama

Editorial

Recent advances and practices in dynamic traffic assignment
T. Iryo and S.-i. Nakayama 189

Special Issue Papers

Dynamic marginal cost, access control, and pollution charge: a comparison of bottleneck and whole link models
R. Zhong, A. Sumalee and T. Maruyama 191

A probability model and sampling algorithm for the inter-day stochastic traffic assignment problem
C. Wei, Y. Asakura and T. Iryo 222

An alternative definition of dynamic user optimum on signalised road networks
Y. E. Ge and X. Zhou 236

Signal setting with demand assignment: global optimization with day-to-day dynamic stability constraints
G. E. Cantarella, P. Velonà and A. Vitetta 254

Semi-dynamic traffic assignment model with mode and route choices under stochastic travel times
S.-i. Nakayama, J.-i. Takayama, J. Nakai and K. Nagao 269

Blocking roads to increase the evacuation efficiency
O. Huibregtse, A. Hegyi and S. Hoogendoorn 282

Traffic flow model of network simulators for estimation of CO_2 emissions
H. Mori, H. Kitaoka, M. Ishida and Y. Asakura 290

Volume 46 Number 4 **October 2012**

Special Issue: Advances in Transportation Analysis

Guest Editors: Maurizio Biellii, Mauro Dell' Orco, Michael J. Smith and Jacek Zak

Editorial

Special issue on: advances in transportation analysis
M. Biellii, M. Dell' Orco, M. J. Smith and J. Zak 303

Special Issue Papers

Using automatic number plate recognition technology to observe drivers' headway preferences
B. Gunay 305

Comparative study on travel time reliability indexes for highway users and operators
H. Wakabayashi and Y. Matsumoto 318

Comparison of static vehicle flow assignment methods and microsimulations for a personal rapid transit network
J. Schweizer, A. Danesi, F. Rupi and E. Traversi 340

Dynamic process models of combined traffic assignment and control with different signal updating strategies
C. Meneguzzer 351

Design of a tabu search algorithm for assigning optimal bus sizes and frequencies in urban transport services
F. Ruisanchez, L. dell'Olio and A. Ibeas 366

Improved rehandling strategies for the container retrieval process
T. Ünlüyurt and C. Aydın 378
